TEAM CHEMISTRY & MOVES LIST

MARTIN: NO FILTER FIGHTERS II TURBO

NFF II TURBO

THE STORY OF

OTIS HARTWELL

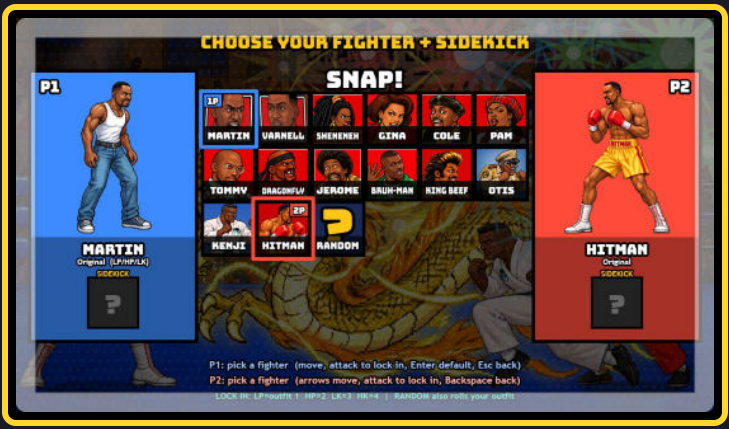

A PERFECT SQUARED INC. GAME

based on the original by TDHampton Productions

Free for the people. Pass it to a friend. Then beat that friend.

Welcome to Detroit. Sixteen fighters, one busted ATM, a hair salon that will never be the same, and a boxer at the door. This guide covers every move, every hidden boost, and every dirty trick in the game — all of it pulled straight from the engine, so the numbers are real.

HOW TO READ THIS GUIDE

Character select: all 14 fighters + RANDOM, sidekick picks, and the outfit footer (LOCK IN: LP=outfit 1 HP=2 LK=3 HK=4).

Default keys — Player 1: W A S D to move • F = LP (light punch) • G = HP (heavy punch) • V = LK (light kick) • B = HK (heavy kick) • H = Special • T = Super 1 • Y = Super 2 • C = Sidekick • R = Block • E = Taunt

Default keys — Player 2: Arrow keys • J = LP • K = HP • M = LK • Comma = HK • L = Special • I = Super 1 • O = Super 2 • Period = Sidekick • Right Shift = Block • P = Taunt (Enter also taunts)

Controller (standard pad): X = LP • Y = HP • A = LK • B = HK • RB = Special • RT = Super 1 • LT = Super 2 • LB = Sidekick • Back = Taunt • Start = Pause. Playing solo? Either keyboard layout AND any controller all drive Player 1 — grab whatever's closest.

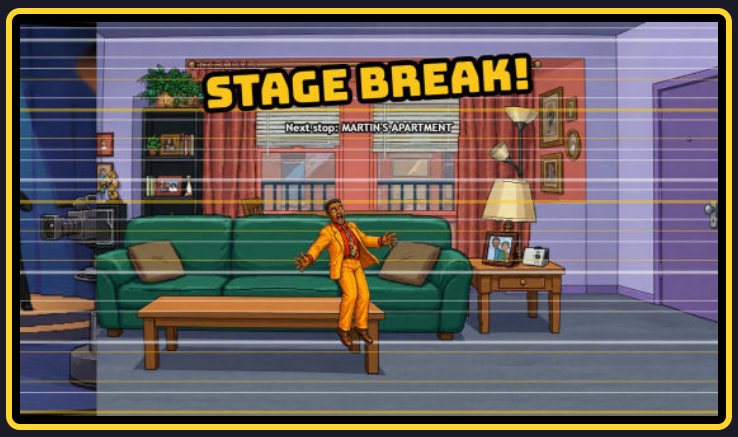

Motion shorthand (always relative to the way you're facing):

- **QCF** = quarter-circle forward (down, down-forward, forward)
- **QCB** = quarter-circle back (down, down-back, back)
- **DP** = the uppercut motion (forward, down, down-forward)
- **HCF / HCB** = half circle (back-to-forward or forward-to-back along the floor)

Meter: your super gauge holds **3 bars**. Supers cost 1 bar unless the move list says otherwise. Meter **carries over between rounds**, so bank it.

Which build is this? This guide is written for **v18.8** — THE FIGHT CLUB UPDATE. Everything on these pages is in the game you can download today. **Online players: grab the new build — both players need the same version to connect.**

FIGHT SCHOOL: THE UNIVERSAL RULES

Wall STAGE BREAK: a knockdown at the wall smashes them into the next stage.

Every fighter (except the motion-input royalty, see King Beef) works like this:

- **LP, LK, HP, HK** — your four attacks. **Chains work ON HIT, from a light:** a jab or short kick that connects can chain straight into any other ground normal (light, heavy or the launcher). Heavies don't chain into normals, and **nothing chains on block** — a blocked string stops.
- **Launcher** = down + HP. Pops them into the air. Follow up with jumping attacks, end with the jumping HK — every fighter's jumping HK is a **spike** that slams them back into the floor.
- **HIT-CONFIRM:** a normal can cancel into a special or a super only for a short moment after it connects — about **a fifth of a second**. Land it, see it, cancel right away.
- **SUPER INTO SUPER:** a super that connects can cancel straight into another super, if you have the meter. Every hit of the second super still has to be blocked on its own.
- **LINK ATTACK:** once a chain is connecting, just keep tapping LP — the game climbs the series for you, and if you've got a bar it finishes in a super. The lazy man's combo, and it works.
- **Dash:** tap forward twice. **Back dash:** tap back twice. **Super jump:** tap down, then up.
- **Special** = your Special button (many fighters have a second special on forward + Special, or a counter on back + Special).
- **THROW (everybody):** get close and press **LP + LK together**. Hold **back** while you throw and it's a **back throw** over your head. Caught? Press **LP + LK fast** to break it: **THROW TECH, +100 QUANTA.** Both throw on the same frame? **CLASH** — +100 QUANTA each (once every 2 seconds for the same pair). Jabs and kicks can be thrown while they start up and recover, not while they hit; a whiffed throw is punishable.
- **Command grabs** = down + Special (for fighters who have one). Those are **unblockable and unparryable** — answer them with distance, a jump, or a hit first. Kenji's grabs are his own (see his section).
- **Crouching jab and low kick (everybody):** down + LP is a crouching jab (hits mid). Down + LK is a **LOW** kick — standing block does not stop it; block it crouching (down-back).
- **All jumping attacks are overheads** — they beat crouch block. Stand up and block high.
- **Counter hit:** smack somebody during their own wind-up for **+25% damage** and a big red COUNTER.

- **Combo scaling:** hits 1–2 full damage, then 80%, 60%, 45%, down to 35%. Long combos still hurt; they just stop being homicide.
- **STALE moves:** spam the same attack and it rots — about 15% weaker per recent repeat, down to 40%. The announcer-of-the-mind says: mix it up.
- **Wall bounce:** heavy hits near the edge of the stage pop them back off the wall for extra juggle — once per combo.
- **First Attack:** the first clean hit of the round pays +30 meter. Start mean.
- **Multi-hit escape:** after the first hit of a multi-hit special or normal, you get a short gap to hold back and block the rest. Supers still hit all the way once they land.
- **One-piece K.O.:** a fighter who is out of health stays down — nobody gets up before the K.O.

Motions made easy: the long motions are lenient on purpose — the in-between diagonals are optional and a quick finish is all it takes. That covers King Beef's Godzilla Fire (back, down, forward + P — it needs a **fresh** press of back; a fireball motion from a block you're still holding stays a fireball), every QCF QCF super (King Beef, The Hitman), Sheneneh's QCB QCB, Young O.T.'s pile-on (QCF + HP), and the LP LP forward LK HP supers (a down-forward counts as forward).

TEAM CHEMISTRY & RELATIONSHIP BOOSTS

Team chemistry: win round 1 with Pam + Tommy together - "PAM LIKES TOMMY MORE! +6%".

Team chemistry: win round 1 with Pam + Cole together - "PAM'S OKAY WITH COLE NOW! +2%".

Win a match as beat-up (swole) Martin and HITMAN walks in to salute: "Yeah, you got a lot of heart, man."

This is the signature system of NFF II Turbo - the one the guide is named after. Plenty of games have tag teams; we don't know another fighting game where who the characters ARE to each other pays out in the match, announced on screen, straight from the show's own lore. Your sidekick and bench pick aren't just cosmetic. Certain pairings are *canon*, and the engine pays out for them:

- **Pam + Tommy** (either one fighting with the other as sidekick or bench): **+5% damage dealt.** Win round 1 together with Pam fighting and it upgrades — **"PAM LIKES TOMMY MORE! +6%"** — and she also starts taking 5% less.
- **Cole + Pam** (sidekick only — this one's complicated): Cole deals +5% and takes 10% less with Pam around. Pam with Cole around takes 5% MORE... she's not like that about him. Win round 1 together and the screen announces **"PAM'S OKAY WITH COLE NOW! +2%"** — her penalty disappears and she picks up a small damage bump.
- **Martin + Gina**: they've got each other's back — both take **7% less**, and Martin deals **+7%**.
- **Tommy + Cole** (the boys): **+5% dealt.**

- **King Beef + a lady from the ROSTER** — Sheneneh, Gina or Pam as his sidekick or reserve (or King Beef as theirs): **+6% dealt, both ways.** The King performs better with an audience. (His stage dancers have nothing to do with this one.)
- **Kenji + Dragonfly**: Kenji takes **8% less**, and his two-bar dragon goes gold (**TWIN FLAMES X2**).
- **Martin + Pam** as a pair unlocks the two-bar team super **That Ain't No Damn Puppy!** — and the whole team quietly takes roughly 10% less damage.

Bench rule: a bench pick who hasn't joined the fight yet gives **no** chemistry — no boost, no team super, no gold dragon. The moment they ASSEMBLE (stage break, landed throw, or losing a round), the pairing kicks in. A sidekick counts from the first bell.

Pick your rival: in **Arcade** and **Training** you now choose who you go up against — the CPU's fighter *and* their sidekick (the RANDOM tile still lets the CPU pick). We added this for **better chemistry-balanced training**: set up the exact pairing you want to learn — Martin + Gina, Cole + Tommy, the puppy team — and train against its boosts until you know them cold. In Arcade your pick is your first fight; the ladder carries on from there.

Rival intros: certain matchups open with real back-and-forth conversations from the show instead of generic lines — Martin vs Varnell, Gina vs Sheneneh, Cole vs the world, Jerome calling Pam "bunny"... And Martin vs HITMAN opens with the line: *"Yeah, they call you the Hitman. Well, I got a call from Sugar. He calls you the get-hit man."*

THE BIG FIGHT: against HITMAN, the first punch he lands puffs Martin's face up on the spot (the gag). Then, in the **Charity Bout** and the **Arcade secret fight**, at 35% health Martin answers for real: bigger, 35% faster, burning blue - **"I'M THE GREATEST!"** Only the big one is blue. Big fights make big men.

Swole Martin: Martin at 35% health swells up and stays swollen all round (see his section). Hit him with a super while he's like that and he'll tell you himself: "This could hurt."

THE HITMAN's cameo: win a whole match as **beat-up Martin** (against anyone but HITMAN himself) and don't touch anything - the champ walks in, salutes, and delivers it straight: **"Yeah, you got a lot of heart, man."** Martin's answer: *"I don't wanna fight no more."* One of the best-kept moments in the game. If HITMAN is on a team that night he comes in on HIS OWN team's side; if he's in Martin's corner you just hear him from the corner; and if he was mid-assist when the KO landed, he stays right where he stands and does it from there. He never shows up to a match he's fighting in.

THE FIGHTERS

Damage notes: most of the cast shares the same "class ruler" on normals — LP 45, LK 60, HP 90, HK 105, Launcher 80; in the air 45 / 60 / 85 / 100 (spike). Below we list every fighter's *named* moves and call out whoever bends those numbers. Everyone has 1000 health unless noted.

MARTIN

Martin (Pistons #11 jersey) lands his Steppin' Rush super on Varnell, live on The Varnell Hill Show.

Swole Martin: below 35% health he puffs up - "I GOT HIM, GINA!"

Martin's full pause-screen move list (vs Varnell).

"Get to steppin'!"

MOVE	INPUT	NOTES
Quick Slap / Knee / Lunge Punch / Shoulder Rush	LP / LK / HP / HK	Knee and Shoulder Rush lunge forward
Double Uppercut (Launcher)	down + HP	
Get To Steppin'!	Special	The hand wave sends a shockwave along the floor that **shoves them way back** (70)
Guard Your Grill	fwd + Special	Boxing rush — jab, jab, body, big right (ends in knockdown)
Sheneneh Slap	down + Special	Unblockable grab: the slap, then the knee (70 + 90)
Steppin' Rush	Super 1 (1 bar)	Invincible dash — if it touches, the whole combo comes out, ends in a launcher
Mic Drop	Super 2 (1 bar)	Cartoon Martin bursts out of a TV and runs the combo; real Martin drops the mic only if the toon connected
That Ain't No Damn Puppy!	LP, LP, fwd, LK, HP (2 bars)	**Only with Pam as his teammate** — the team takes less damage all match too

His gimmick — the Beatdown Arc: drop Martin to 35% health and he yells **"I GOT HIM, GINA!"**, his face swells up, and he stays beat up for the rest of the round (portrait included). Beat-up Martin taunts with **"LET ME SAY MY PRAYERS..."**, mutters delirious nonsense when hit, and if your opponent fires a super at him, he knows: *"This could hurt."* Win the match while beat up and somebody very special comes to pay respects (see Hidden Chemistry).

Play him like: the main character he knows he is — dash in, talk trash, Get To Steppin' to reset the conversation.

VARNELL HILL

Varnell Hill smacks Martin with the Seafood Slap super on his own show.

Varnell's full pause-screen move list (vs Martin).

The talk-show host with hands.

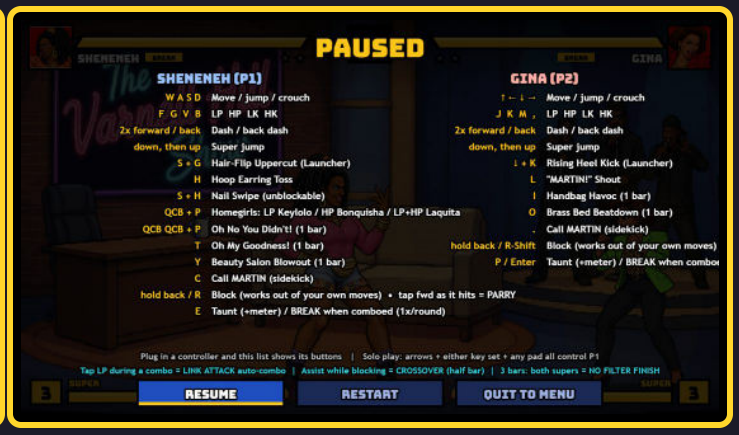

MOVE	INPUT	NOTES
Rising Kick (Launcher)	down + HP	
Ocean & Bay Beatdown	Special	"CATFISH IS DELICIOUS!" — a rolling fish wave (2 hits)
Seafood Slap	Super 1	Invincible slide into a two-hit slap, big finisher (60+60+95)
Catfish Cannon	Super 2	A charging rush that ends with a **giant catfish** fired across the stage
Snooky! Do Work!	QCF + LP+HP (1 bar)	Calls Snooky in to handle it

No grab — keep him at midrange where the seafood lives. **Play him like:** a man hosting his own show: control the pacing, make them walk into the catfish.

SHENENEH

Sheneneh (Control outfit) runs "Oh My Goodness!" on Gina in her Sho'Nuff Hair Salon.

Sheneneh's full pause-screen move list, homegirls included (vs Gina).

Sho'Nuff Salon's finest. You gotta bob and weave.

MOVE	INPUT	NOTES
Hair-Flip Uppercut (Launcher)	down + HP	
Hoop Earring Toss	Special	A flying earring that hits for a full **100** — one of the strongest plain projectiles in the game
Nail Swipe	down + Special	Unblockable grab: swipe, then the claw (70 + 90)
Homegirls	QCB + P	**LP = KEYLOLO! • HP = BONQUISHA! • LP+HP = LAQUITA!** One of her girls runs in and gets busy. Works on any stage — at the salon they get up out of their chairs
Oh My Goodness!	Super 1	Invincible claw rush into a five-hit string ending in a launcher
Oh No You Didn't!	QCB QCB + P (1 bar)	**All three homegirls at once**
Beauty Salon Blowout	Super 2	The blow-dryer becomes a flamethrower (4-hit blast)

Play her like: a projectile queen with backup on speed-dial. Earring from range, homegirl to cover your dash.

GINA

Gina (Green Blouse) swings Handbag Havoc at Sheneneh in Club GTD.

Gina's full pause-screen move list (vs Sheneneh).

CEO energy. Do not play with her.

MOVE	INPUT	NOTES
Handbag Swing	HP	The purse is regulation legal
Rising Heel Kick (Launcher)	down + HP	
"MARTIN!" Shout	Special	A sonic shout wave. Against Martin the popup literally screams **MARTIN!!** — against anyone else it's just **HEY!!**
Handbag Havoc	Super 1	Multi-hit purse rampage ending in a spin knockdown
Brass Bed Beatdown	Super 2	"YOU GOT TO PUSH!" — she heaves the brass bed through them and slams it down (hits even on the floor)

No grab. **Play her like:** the one with the plan — poke, shout to interrupt, save a bar for the bed.

COLE

Cole (Floral Shirt) rains the 9-hit Spoon Storm on Martin in the apartment.

Cole's full pause-screen move list (vs Martin).

"Rent 'em spoons!"

MOVE	INPUT	NOTES
Windmill Uppercut (Launcher)	down + HP	
Rent 'Em Spoons	Special	A fanned cone of **16 actual spoons**, each its own projectile
Mama's Boy Bear Hug	down + Special	Unblockable hug: squeeze, squeeze, shove
Spoon Storm	Super 1	Three bursts of **28 spoons each**. The sky goes cutlery
Big Shirley	Super 2	The bird call... then **Big Shirley** herself comes through. Cole ducks. You should too

Play him like: chaos with a kind heart — fill the screen with spoons and let Shirley negotiate.

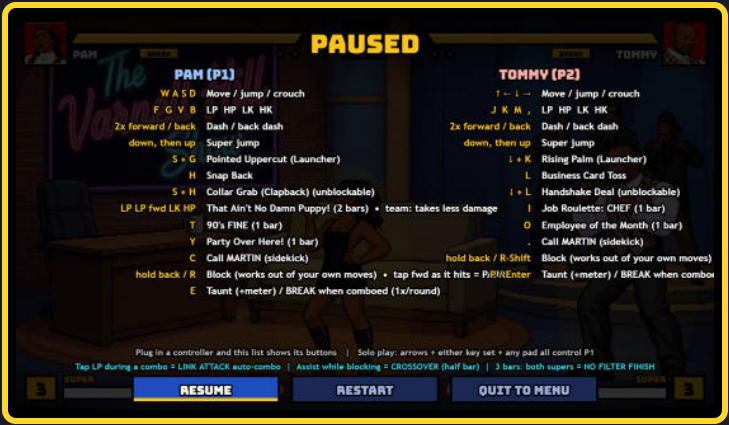

PAM

Pam (Engagement Party dress) strikes her 90's FINE pose on Gina in Club GTD.

90's FINE: camera-flash photo frame, heart eyes and SNAP!

Pam's full pause-screen move list, puppy team line included (vs Tommy).

90's fine, and she knows it.

MOVE	INPUT	NOTES
Pointed Uppercut (Launcher)	down + HP	
Snap Back	Special	One windup backhand for a filthy **140** — the hardest single normal-speed hit in the cast's specials
Collar Grab (Clapback)	down + Special	Unblockable grab into a five-part clap-out
90's FINE	Super 1	A strut, a dash, and a **photo-shoot of freeze-frame slaps** (45, 45, 45, then 105). Zero chip — it must HIT
Party Over Here!	Super 2	A groove wave crawls along the floor — **unblockable, jump it or dance** — on hit it cuts to the full party cinematic
That Ain't No Damn Puppy!	LP, LP, fwd, LK, HP (2 bars)	Only with Martin on her team

90's FINE extras: while the camera freezes on each slap, male fighters stop and **gawk with little hearts**; Pam, Gina and Sheneneh victims just roll their eyes. And **Cole takes 25% extra** from it. He had it coming? He had it coming.

Play her like: she's doing you a favor by being here — whiff-punish with Snap Back, make them scared to stand on the ground when you have a bar.

TOMMY

Tommy's Job Roulette super (this spin: DJ) takes over The Varnell Hill Show.

Tommy's full pause-screen move list (vs Pam).

Does he have a job? Today? Six of them.

MOVE	INPUT	NOTES
Rising Palm (Launcher)	down + HP	
Business Card Toss	Special	"MY CARD." Fast flying card
Handshake Deal	down + Special	Unblockable grab — the handshake, the flip, the rush. Business concluded
JOB ROULETTE	Super 1	Spins the wheel and yells **"HE GOT A JOB!"** — one of SIX jobs comes out at random: **CHEF** (pan combo) • **CONSTRUCTION** (floor quake) • **FIREFIGHTER** (hose blast) • **MAIL CARRIER** (letter storm) • **BARBER** (clipper rush) • **DJ** (bass wave)
Employee of the Month	Super 2	He gets hired, strolls across the stage untouchable, and finishes them with the **framed plaque** — it even hits them lying down

Play him like: a professional — fish for the grab, then let the roulette decide what you do for a living this round.

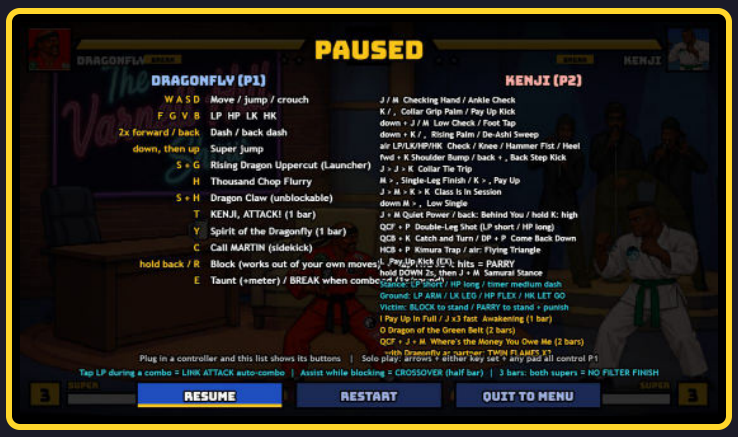

DRAGONFLY JONES

Dragonfly Jones sends the golden Spirit of the Dragonfly into Jerome in his own dojo.

Dragonfly's super summons his student: "KENJI, ATTACK!"

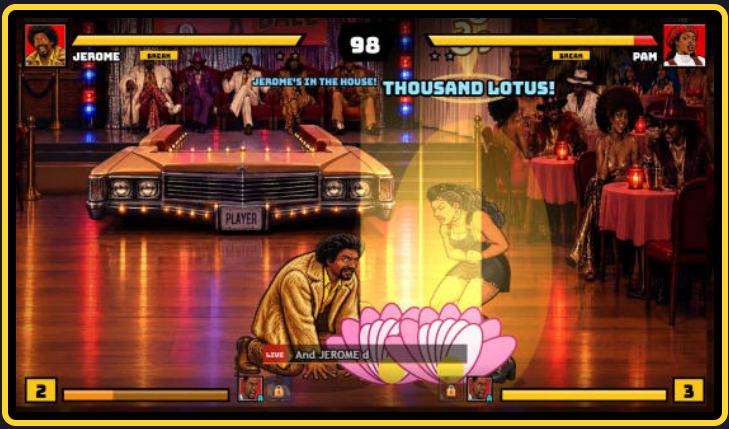

Dragonfly's full pause-screen move list (vs Kenji).

Somebody done told you wrong, punk!

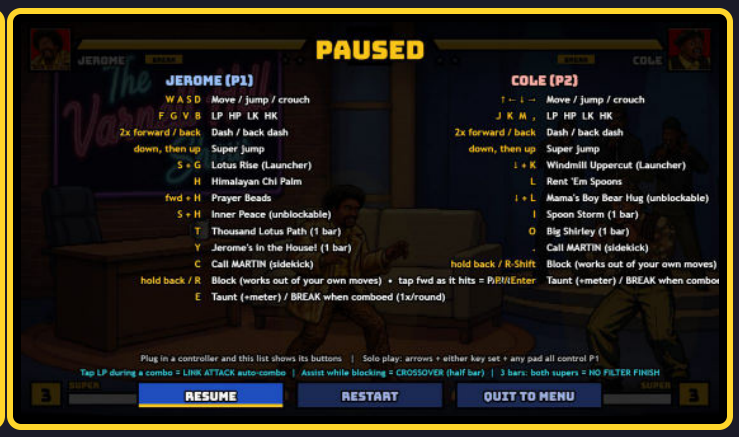

MOVE	INPUT	NOTES
Rising Dragon Uppercut (Launcher)	down + HP	
Thousand Chop Flurry	Special	Five rapid chops into a crane finish
Dragon Claw	down + Special	Unblockable grab — chops on the house
KENJI, ATTACK!	Super 1	His star student runs in and **does all the work** while Dragonfly supervises with his arms crossed
Spirit of the Dragonfly	Super 2	Summons a giant spirit dragon (7 hits, hits grounded opponents)

His sidekick move is a **Mini Dragon**. His intro is a full kung-fu pacing routine with his own theme. He owes Kenji $80 and the whole game knows it. **Play him like:** a dojo master who charges tuition — poke with chops, spend meter on other people doing the fighting.

JEROME

Jerome's Thousand Lotus Path under the spotlight at the Playa's Ball.

Jerome's full pause-screen move list (vs Cole).

The playa from the Himalayas came back enlightened.

MOVE	INPUT	NOTES
Lotus Rise (Launcher)	down + HP	A golden lotus blooms out of the floor under them
Himalayan Chi Palm	Special	A golden chi orb that puts them in a **TRANCE** — frozen in place, still taking hits
Prayer Beads	fwd + Special	A wheel of giant prayer beads rolls the floor — **110** and a knockdown
Inner Peace	down + Special	Unblockable grab that leaves them **entranced for a long beat** — then go to work
Thousand Lotus Path	Super 1	A golden avalanche down the lane
Jerome's in the House!	Super 2	Blizzard entrance, strut, and an unblockable shatter finish on anyone it caught

Trance rules: frozen fighters keep eating hits where they stand, but any BIG hit (knockdown, launcher, shatter) snaps them out — "SNAP OUT OF IT!" So after a trance, run your best combo, not your flashiest. **Play him like:** patience monetized — land one freeze, collect the whole rent.

BRUH-MAN

Bruh-Man's Slo-Bop Sammich Storm erupts on the Fifth Flo'.

Bruh-Man's From the Fifth Flo'! puts them THROUGH THE FLOOR into the apartment below.

Bruh-Man's full pause-screen move list (vs Cole).

From the fifth flo'. Ain't nuttin'... just chillin'.

The big man bends the damage ruler: LP 55, LK 60, HP 110, HK 115, Launcher 85.

MOVE	INPUT	NOTES
Big Shove (Launcher)	down + HP	
Sammich Toss	Special	Throws a sandwich (80). It splats
Fifth Flo' Shortcut	fwd + Special	Climbs out the window... and drops back in from above, elbow first
Ain't Nuttin' (counter)	back + Special	He leans back; tag him during it and eat an unblockable 130
Fifth Flo' Squeeze	down + Special	Unblockable bear hug with extra squeezes
Slo-Bop Sammich Storm	Super 1	He walks forward with armor (hits don't stop him) through a storm of sandwiches, ends in a 130 unblockable

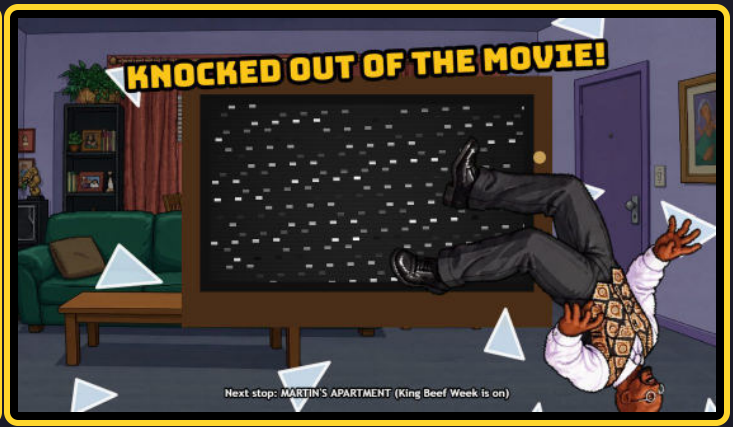

From the Fifth Flo'!	Super 2	Climbs out, the camera goes up the building, four fingers out the window... **belly flop for 260**. Blockable only if you were already guarding

His taunt is a meal: once per round, taunting is a **SAMMICH BREAK — heals about 70 health**. The only self-heal in the game. And read the Stage Breaks section for what the belly flop does on his home stage. **Play him like:** a landlord — slow, armored, and the rent is 110 a swing.

KING BEEF

King Beef fires Each And Every One Of Your Worlds on his Godzilla-movie set.

King Beef's movie set: KNOCKED OUT OF THE MOVIE - out through the TV.

King Beef's motion-input move list, SF-style notation legend included (vs Tommy).

Star of stage and screen. The only motion-input fighter in the game — a classic arcade fireball kit in sequins.

Glass superstar: hits harder than the cast (LP 48 / LK 64 / HP 98 / HK 112) but has **12% less health** than anyone else.

MOVE	INPUT	NOTES
Sole Island Blast	QCF + P (or Special)	The fireball. HP version flies fast
Disco Ball Drop	in the air, QCF + P	A falling disco ball

Godzilla Fire	HCF + P	Slow 3-hit flame. Start the motion with a **fresh** press of back — from a held block, the same roll stays a fireball
GO KING BEEF!	DP + P (or fwd + Special)	Invincible rising uppercut; HP version hits twice
I MUST DANCE!	QCB + K (or back + Special)	The spinning dance across the floor — works in the air
Soul Train Flip	DP + K	Flip over them: P = elbow, K = dive kick, land with nothing = **Electric Slide**
WE MUST FLEE!	DP + LP+HP	Teleport. Reverse the motion to flee backwards
Medallion Smash	fwd + HP	Overhead — beats crouch block
Platform Shoe Dive	air down + HK	Dive kick
LADIES!	QCB + P (or down + Special)	One of his girls runs in: **LP = pink (high kick), HP = orange (boa whip), LP+HP = green (hip bump)**
Each And Every One Of Your Worlds	QCF QCF + P / Super 1 (1 bar)	The giant beam
GO KING BEEF, GO!	QCF QCF + K / Super 2 (1 bar)	The girls run the combo, the chant starts, he finishes with the big uppercut
Before Godzilla Gets To The Airport	LP, LP, fwd, LK, HP (2 bars)	The glide-in grab. The screen goes black. You don't see what happens. He does

The Coat Saga: lose round 1 as King Beef and his own ladies run in and **take his coat** ("Oh King Beef, please don't be this way...") — he fights the next round in the bodysuit, devastated. Make it to the final round and they bring it back: **THE KING IS BACK.** Also: any super that ends a match gets the full girls-and-chant victory production. **Play him like:** you already know — fireball, uppercut, and when in doubt, DANCE.

OTIS

Otis hauls Jerome off with Keep On Moving! outside the Bank of Detroit (Ms. Jerry at the ATM).

Bank stage intro: Ms. Jerry finishes at the ATM - "See you later, big papa."

Otis's full pause-screen move list (vs Jerome).

Bank security. Old man strength is real: 5% extra health.

MOVE	INPUT	NOTES
Nightstick Club	HK	
Pop-Up Uppercut (Launcher)	down + HP	
Nightstick Boomerang	Special	"GET ON OUT HERE, BOY!" — the stick comes BACK
FREEZE! (flashlight)	fwd + Special	A cone of authority to the face
Crawl & Pop-Up	back + Special	Crawls in low — **goes under fireballs** — then pops up with a launcher
Tackle & Ground-and-Pound	down + Special	Unblockable takedown with three pounds on the ground
Keep On Moving!	Super 1 — **HALF a bar**	A charging shoulder rush, cheap enough to throw out all day
Let Me Show You How I Flow	Super 2 (1 bar)	The old-school flow combo into a launcher

You Going Down Today, Boy!	LP, LP, fwd, LK, HP (2 bars)	Opens with THAT kick. **The kick must land or the whole thing whiffs.** When it lands, it's a production

The Story of Otis: beat **The Hitman** in a match as Otis (a human player, offline) while Young O.T. is still locked, and an animated short about Otis's 1956 Army boxing days plays — once — right before **YOUNG O.T.** joins the roster, with its own original score, "Still Standing". The one-round Charity Bout counts. The Story of Otis can also be watched in the Reveal Theater.

Play him like: a man with a pension — patient, low, boomerang out, and punish disrespect with the two-bar special.

KENJI

Kenji's EX Pay Up Kick connects on Martin in Dragonfly's Dojo.

Fighter 13. The quiet one from the dojo. Playable from the start — and he's a full grappling system in a gi.

Kenji doesn't play by the magic-series rules. He has his own striking chains, silent grabs, a floor game, and a stance. This is the longest section in the guide because he's the deepest thing in the game.

STRIKES

Checking Hand (LP, 32) • Ankle Check (LK, 38, **low**) • Collar Grip Palm (HP, 66) • Pay Up Kick (HK, 80, knockdown) • crouching: Low Check (28) / Foot Tap (32, low) • Rising Palm launcher (down + HP, 65) • De-Ashi Sweep (down + HK, 65, low knockdown) • Shoulder Bump (fwd + HP, staggers) • Back Step Kick (back + HK, retreats as it hits) • airs: Air Check / Air Knee / Hammer Fist / Falling Heel (the heel spikes).

CHAINS (PRESS THE NEXT BUTTON SHORTLY AFTER A CLEAN HIT)

Chain finisher: HP > HK "Pay Up" boots Tommy across the dojo.

- **LP → LP → HP** — Collar Tie Trip
- **LK → HK** — Single-Leg Finish
- **HP → HK** — Pay Up
- **LP → LK → HP → HP** — Class Is In Session (the big one, 100 on the ender)
- **crouch LK → HK** — Low Single

Every chain ender except Pay Up dumps them straight into Kenji's **ground game** (below). The window is strict — chain off clean contact, not hope.

QUIET POWER (THE GRABS)

Quiet Power (LP+LK): Kenji hoists Martin for the front lift.

- **LP + LK together** = the silent grab (120). **Hold HP during it** and it upgrades to the high carry (160).
- **back + LP + LK** = Behind You — he steps behind them first.
- **Escape:** tap **LP + LK within a blink** (7 ticks) of being grabbed to tech out.
- **Kimura Trap (HCB + P)** = command grab, 155, **cannot be teched**. In the air the same motion is the **Flying Triangle**.
- **QCF + P** = Double-Leg Shot (LP short / HP long) — a takedown straight into the ground game.
- **QCB + K** = Catch and Turn (catches their strike). **DP + P** = Come Back Down — snatches jumpers out of the sky and plants them.

THE GROUND GAME (AFTER A PIN)

Ground state with ARM GRIP! hit - the panel reads LP ARM / LK LEG / HP FLEX / HK LET GO.

Victim escape: parry the ground strike (PARRY!) to stand up with a punish.

Kenji's side — pick one:

- **LP = ARM grip** (45)
- **LK = LEG grip** (60, slower wind-up)
- **HP = FLEX** — let them up and pocket **+15 meter**
- **HK or Special = LET GO**

He gets **two follow-ups max** (the second does half), then he stands up anyway; the whole pin times out in about a second and a half.

Victim's side — the grip is telegraphed, so:

- **BLOCK the strike** (hold back/block as it comes) → you stand up safe.
- **PARRY the strike** (tap forward on the beat) → you stand up AND Kenji is wide open. The punish is yours.

SAMURAI STANCE

Hold DOWN 2 seconds, then LP+LK: the seated Samurai Stance.

Hold DOWN to charge (about a second — the in-game list says hold it two to be safe), then press **LP + LK**: Kenji drops flat into the stance. While he's down there, strikes literally pass over him. From the stance: **LP = short dash, HP = long dash, wait = medium dash on its own timer.** The stance dash **takes down anyone on**

their feet — even mid-attack. It can even catch jumpers out of the air. Stand back up with UP, block, or parry.

SUPERS

PAY UP IN FULL! (1 of 4): the kick sends them flying toward the wall...

PAY UP IN FULL! (2 of 4): Kenji leaps and plucks them off the wall (WALL BOUNCE!)...

PAY UP IN FULL! (3 of 4): ...slams them into the floor...

PAY UP IN FULL! (4 of 4): ...and keeps them in the ground hold.

LP x3 fast: Kenji's Awakening rush (he takes his money at the end).

Where's the Money You Owe Me?! - the $80 collection, naturally shown against Dragonfly.

With Dragonfly as his partner, Dragon of the Green Belt becomes TWIN FLAMES X2!

Kenji's full grappler move list: chains, stance, ground game and supers (vs Dragonfly).

- **Pay Up In Full** (Super 1, 1 bar): a flying kick that launches the full production — into the wall, off the wall, Kenji leaps, catches them in the air, takedown.
- **Kenji's Awakening** (**tap LP three times fast**, 1 bar): a blurred dash-in flurry — four hits of 35 and a 75 finisher. Against Dragonfly, the last hit shakes money loose: **$$$**.
- **Where's the Money You Owe Me** (QCF + LP+LK — 2 bars): the cinematic. Punch → wall → leap → air grab → takedown → **armbar**. The armbar is an **HP RACE**: Kenji mashes HP to flex it in (three flexes = paid in full), the victim mashes HP to roll free — and the defender wins ties. Fight for your arm.
- **Dragon of the Green Belt** (Super 2 button, 2 bars): Kenji's own spirit dragon. Bring **Dragonfly** as his teammate and it turns gold: **TWIN FLAMES X2.**

THE RED PARRY BONUS

CHI PUNCH - red-parry anything and your opponent **freezes**. Kenji gathers chi (you can still walk him in), then any button fires a two-fisted punch with a **stomp** that sends them spinning into the wall for a **WALL BOUNCE**. Gather longer, hit harder.

Parry grab: a regular (blue) parry gives Kenji **grab precedence** for a split second. If the opponent is inside his grab reach, his grab beats their strike and **can't be teched** — the popup reads **PARRY GRAB!** Parry, then grab.

Play him like: a straight-A student collecting a debt — strikes to open the account, grabs to collect, and never, ever mention the $80 unless Dragonfly's in the room.

HITMAN

HITMAN's Knockout Special right hand flattens Martin (Boxing outfit) in the Charity Bout ring.

Round 1 opening bell: the suit rips off ("RIIIP!") and the scraps go flying.

Martin's round-1 intro vs HITMAN: "Yeah, they call you the Hitman. Well, I got a call from Sugar. He calls you the get-hit man."

Lead Hook (LK) snaps Tommy's head back.

Overhand Right (HK) crashes down on Cole.

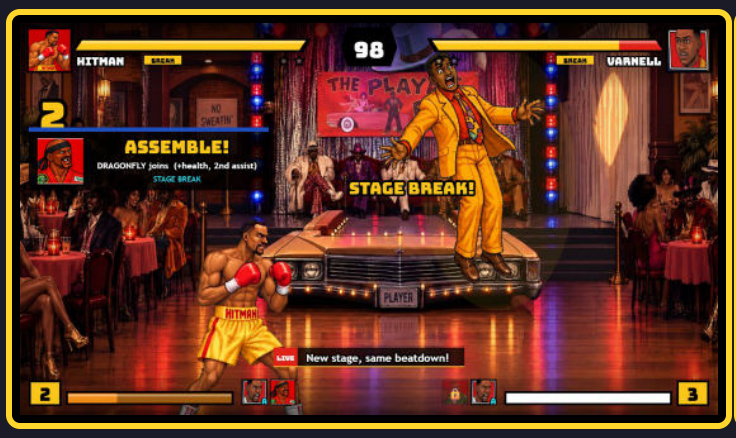

Knockout Special: flicker, flicker, then the huge right drops Jerome.

THROUGH THE WALL: the punch goes through Varnell - ghost freeze while the real body flies.

The wall is left with a hole in Varnell's own silhouette.

...and he lands in the next stage like a normal wall break (his reserve assembles off it).

Under 20% health: HITMAN'S MAD! - red glow, faster recovery, faster feet.

HITMAN's full boxing move list (vs Martin).

They call him THE HITMAN. A boxer — no kicks, no apologies, and the biggest health bar in the game (1.4x). Playable from the start, and he fights in the Charity Bout ring.

MOVE	INPUT	NOTES
Flicker Jab	LP	Stupid long reach (42)
Lead Hook	LK	48
Straight Right	HP	92 — and it drives them backwards across the stage
Overhand Right	HK	Big wind-up, 100, also shoves

Body Jab / Body Hook	down + LK / down + HP	The body work (40 / 88). Both count as punches for **CALL DROPPED!**
Shovel Uppercut	down + HK	95, knockdown
Uppercut (Launcher)	fwd + HP	**82** — bends the launcher ruler (80). His launcher lives on forward, not down
Air Hook	LK in the air	**62** — bends the air ruler (60)
Slip	back + HK	He rolls under — **high attacks and jump-ins whiff clean through him**
THE HITMAN	QCF + P (or Special)	Jab, jab, straight right — each hit blockable on its own
Knockout Special	QCF QCF + P / Super 1 (1 bar)	Flicker, flicker, the slow wind-up... then a **140** right hand
Through The Wall	QCF QCF + K / Super 2 (1 bar)	A long, readable cock-back — then the punch goes **through** them. See Stage Breaks for what happens next

Versus vs the Charity Bout: in **Versus, online, Training and normal Arcade** he's evened out — no MAD mode and a little less speed. The full champ only shows up in his boss fights: the **Charity Bout** and Martin's Arcade **secret boss** fight.

HITMAN'S MAD! *(boss fights only)* Drop him under 20% health and the screen tells you. He glows red, moves **35% faster** on top of already having the fastest walk and dash in the game, and shakes off his punches quicker. A boxer who's hurt is not a boxer who's done.

No grab, no fireball, no kicks. **Play him like:** a professional in a game full of characters — jab at max range, slip the jump-in, and keep your hands up. He got a lot of heart, man. So should you.

YOUNG O.T.

OTIS HARTWELL, AGE 28 — the 1956 Army boxing champion of the 92nd Infantry Division, before the gray hair and the glasses. Fighter 15.

How to unlock him: win a **MATCH** against **THE HITMAN** while playing as **OTIS**, in an offline match (the one-round Charity Bout counts). The Story of Otis plays first, then **YOUNG O.T. UNLOCKED!** His square sits on the select screen **directly under Otis**. Online, he's open to both players whether you've unlocked him or not.

MOVE	INPUT	NOTES
Quick Jab / Low Kick / Straight Right / High Kick	LP / LK / HP / HK	42 / 55 / 90 / 100
Rising Uppercut (Launcher)	down + HP	82 — bends the launcher ruler (80)

Air Jab / Jump Kick / Air Straight / Hammer Fist	in the air: LP / LK / HP / HK	The Hammer Fist spikes
GET IN STEP!	Special	Stomps your foot, three straight jabs, ducks, slides in and **UPPERCUTS** — two back somersaults and you land flat on your back
You Going Down Today, Boy!	**QCF + HP** (no meter)	The pile-on: dash-in catch, overhead **SLAM**, the bugler blows TO ARMS and the squad **DOGPILES** you while the flags go up. Blockable. One quick quarter circle — the diagonal is optional, but crouch-then-walk-forward + HP is still a plain HP, and down-forward + HP is still his launcher
CALL THE INFANTRY!	Super 1 (1 bar)	The WAC bugler sounds the charge and the Buffalo Soldiers of the 92nd run your opponent clean through the wall. **STAGE BREAK**
TAPS! TAPS!! LIGHTS OUT!!	Super 2 (2 bars)	A lightning combo into a huge uppercut. Land it and the lights dim while Taps plays. **Finish a match with it** and everybody is carried back to his camp in Italy, 1945, for the full send-off

YOUTH BONUS: he starts every match with an **8% speed + reach** edge that fades as he takes damage. Win a round while it's alive and it **locks** for the rest of the match. **His taunt** is the regulation salute. Ten-hut! His home stage is the **92nd Inf. Div. camp, Italy 1945** — the whole company rings the fight and a bugle call opens every round.

Play him like: a champion with something to prove — straight punches at range, the pile-on when they stand still, and save two bars for TAPS.

TREY

Trey, from Martin: Season 1, "Your Arms Are Too Short to Box with Martin." He came for Tommy at the bar, and he brought his crew. Playable from the start.

Loud, proud, and he never fights alone. His crew is the game plan: send one in to open you up, send them all to finish.

MOVE	INPUT	NOTES
Jab / Snap Kick / Hook / Roundhouse	LP / LK / HP / HK	40 / 55 / 88 / 100
Crouching Jab / Low Sweep	down + LP / down + LK	The sweep is a **LOW** — block it crouching
Rising Fist (Launcher)	down + HP	80
Kick the Actual Factuals	QCF + P (or Special)	Dash in, four quick punches, then the shove that puts you down

Flatten Your Cap	QCB + K	A hop in and a two-fist hammer: **OVERHEAD** — block it standing. LK short hop, HK longer, harder, slower. Unsafe if blocked
Kill That Noise	DP + P	Rising uppercut anti-air that launches. HP is invincible on the way up; LP is faster but not invincible. Very unsafe if blocked
Too Short for a Long Talk	HCF + P	Command grab: grabs a blocker up close (not in the air), then a five-punch flurry and the shove
Crew Call: the Jokester	QCB + LP	Runs in with a punch: "Ice Trey? He's over there in the freezer."
Crew Call: the Cowboy	QCB + HP	Flying kick, then the point: "Why don't you go ask your mama?"
Crew Call: the Nunchuck Partner	QCB + LP+HP	Spins, then strikes: "'Cause I'm crazy, man!"
THE WHOLE CREW	QCB QCB + P / Super 1 (1 bar)	The Jokester, the Cowboy, then the Nunchuck Partner lands the last hit. Every hit is blocked on its own
I'M CRAZY!	QCF QCF + K (1 bar)	The Nunchuck Partner, solo: figure-8 spins, a behind-the-back fake, a **LOW** leg sweep (crouch-block it), a rising swing that launches, a hopping spin, then the big forward strike. Every hit blocked on its own
BAR CHARGE	Super 2 (2 bars)	The bar regulars charge in and run you straight through the wall **into THE ALLEY**. STAGE BREAK

Before the bell: Trey walks in with two friends at his back. They don't fight, they just make sure everybody knows who he came with. **If he loses the match,** those same two come back and wheel him out on a gurney, bandaged up, the long way across the room.

His crew calls and his supers have a summon wind-up, so they can be **CALL DROPPED!** like any other summon. **Play him like:** the man who runs the room — crew call to open, the cap-flattener to break a crouching guard, Kill That Noise for the jump-ins, the flurry to punish, and two bars for the charge when you've got them near the wall.

DEFENSE SCHOOL

Offense wins rounds. Defense wins the running argument.

BLOCKING

- **Hold back** (or your Block key) to guard. You can even block out of your own attack's start-up or recovery — the game lets you bail out of anything that hasn't committed yet.

- **Crouch block** (back + down) for lows — **everybody's** down + LK low kick, plus Kenji's low kicks and sweeps. Standing blocks don't stop lows. But remember **every jumping attack is an overhead**: stand up for those.
- **Blockers aren't stuck:** a blocked normal leaves you a gap to fight back (lights leave you about even, heavies leave the attacker a little short), and only specials can follow a blocked normal.
- **Air blocking is real.** Holding back in the air guards.
- **Chip damage:** specials and supers chip about 22% through block (normals chip nothing) — and chip shrinks the longer you hold a blocked string, so don't panic-mash out.
- Block **three or more chain hits in a row** and the game calls it: **C-C-COMBO BREAKER!** Their chain dies on the spot and you pocket +25 meter.

PARRY (THE BLUE FLASH)

Tap forward as the hit lands: PARRY! (blue flash - no damage, you recover first).

Tap **FORWARD** just before the hit lands (touch screens have a dedicated PARRY button). The window is generous — 14 frames — but a tap locks you out for a little longer than that, so **mashing leaves gaps you get hit through**; a single well-timed tap parries every time. A parry costs them their turn: no damage, no chip, +12 meter, and the attacker **freezes** for a beat. Hit them with your very next attack and it's a **PARRY PUNISH! (+100 QUANTA)**. A clean parry re-arms instantly, so multi-hit supers can be parried hit... by hit... by hit, if your soul is clean.

RED PARRY (THE RED FLASH)

Tap forward during blockstun for the tighter RED PARRY!

Tap forward **while you're in block-stun** — mid-string, between their hits. The window is tighter (8 frames), the payout bigger (+20 meter), and the disrespect immeasurable. A red parry **breaks their string**. Punish them with your very next attack and it's **THE REAPER! — a red parry punish worth +200 QUANTA.** (A punish only counts if your next attack lands, and it pays just its own bonus.) Kenji turns his red parries into the **CHI PUNCH** (see his section).

BIG PLAYS SLOW TIME DOWN

Parries, red parries, throw techs, CALL DROPPED!, armor breaks and parry punishes get a short slow-motion beat — and the player who got beat stays stuck a little longer, so **the winner moves first.**

FIGHTER-SPECIFIC DEFENSE

- **HITMAN's Slip** (back + HK): high attacks and jump-ins pass clean through him — and a slipped attack stays slipped; it can't land late. His block also covers him crouching at nearly full height.
- **Teching throws:** everybody's LP + LK throw breaks with a fast **LP + LK** (THROW TECH, +100).
- **Teching Kenji:** his Quiet Power grabs (including Behind You) can be escaped by tapping **LP + LK** immediately. His **Kimura cannot be teched** — jump it or hit him first.
- **Escaping Kenji's ground game:** block the gripped strike to stand up safe; **parry it to stand up with a free punish.**
- **Caught by the armbar super:** mash HP. The defender wins ties. Believe.

NO FILTER BREAK (THE BURST)

Being combo'd (3 hits or more)? Press **TAUNT**. You explode out of the combo, knock them off you, and get invincibility to stand up. **Once per round** — the little badge by your health bar shows if you still have it.

CROSSOVER

Blocking and in trouble? Press **Sidekick while guarding** (costs half a bar): your partner bursts in, knocks the attacker flying, and you're free.

THE JUDGE'S SCORECARDS

- **DOUBLE K.O.:** if both fighters run out of health on the same frame, it's a **DRAW** and the round is played again with the same round number. Nobody gets it.
- **TIME OVER:** the win goes to whoever has the **bigger health bar by percentage**. An exact tie is a draw too. Protect your lead; the clock is a weapon.

SYSTEMS

SUPER METER

3 bars (300 points). You earn it by:

- **Dealing damage:** about 24% of damage dealt becomes meter (supers themselves don't build it)
- **Taking damage:** about 10% — and it grows to **1.5x under half health and 2x under 30%**. Comebacks are subsidized
- **First Attack** +30 • **Counter hit** +12 • **Parry** +12 / **Red Parry** +20 • **Taunt** +15 • blocking out a chain +25
- Meter **carries between rounds**.

CALL DROPPED!

Summon supers have a wind-up before the help arrives. Hit the caller during it and he takes the damage — but he doesn't flinch and the help still comes. **Unless:** when the summon super's flash ends, the caller flashes **yellow** for about **a third of a second**. Start a punch in that moment — **LP or HP, standing or jumping, a crouching jab, or The Hitman's Body Jab and Body Hook** — and if it lands, **CALL DROPPED!**: no help, and **+200 QUANTA**. Every call waits out that moment, so every call can be dropped. On HARD and EXPERT, the CPU goes for it too.

ARMOR

Specials and super arts have **ARMOR** from start-up through their last active frame — mashing at a special just feeds them the move. Answers: block it, parry it (+50), red parry it (+100), or — the legend play — a single precise **light punch or light kick** knocks them clean out of it: **ARMOR BREAK, +200 QUANTA**. Armor is a bar (the thin teal strip under your super meter): every hit it eats drains it, and when it runs dry the hits count until it trickles back.

SIDEKICKS (ASSISTS)

Assist call: Cole answers Martin's sidekick call mid-fight.

Pick your fighter, then pick a **sidekick** on the select screen. In the fight, the Sidekick button calls them in to throw their signature move (about a 4-second cooldown). Blocking + Sidekick = **CROSSOVER** (half a bar) to blow an attacker off you.

THE BENCH (ASSEMBLE!)

Lose a round and your reserve ASSEMBLES: COMEBACK join, +health and a 2nd assist.

The characters nobody picked don't go home — **one waits on each team's bench**. Your bench fighter **joins the team mid-match** when you:

- **land a throw**, or
- **score a stage break**, or
- **lose a round** (the comeback clause — automatic)

When they ASSEMBLE, your max health grows by **120 on the spot** and you gain a **second sidekick button**. (No bench in the Bonus Stage or the Charity Bout — those you fight alone.)

TEAM SUPER — NO FILTER FINISH

Both supers together (S1+S2): team super - King Beef + Martin double up on Tommy.

At **full 3 bars**, press **Super 1 + Super 2 together**: your sidekick jumps in and you fire both supers as one production. Spends everything. Worth everything.

TURBO STARS

II Turbo speed: TURBO stars shown on the HUD under the timer.

Settings → SPEED: **NORMAL** up through **TURBO** ★★★★ — up to 50% faster. The stars are a promise, not a decoration. **Turbo plays fair:** your timing windows (buffered buttons, dashes, super jumps, special-move motions, hit-confirms) stay the same length in **real time**, so Turbo is faster without being harder to input (parries and throw techs widen only halfway). The CPU reacts at the same real-world speed at every level, the voice-timed supers stay in step with their audio, and the round clock counts real seconds. Online, the host's speed setting rules the match (your friend gets a toast telling them what they signed up for).

QUANTA — EVERY MATCH IS SCORED

Every win pays **QUANTA**, and QUANTA is how players get ranked. Win in straight rounds for **FAST WORK (+1500)**. Style pays: landing a super **+300**, finishing a round with a super **+500**, parry **+50** (red parry **+100**), PARRY PUNISH **+100**, THE REAPER! **+200**, a real juggle **+150**, counter-hit **+100**, CALL DROPPED! **+200**, ARMOR BREAK **+200**, THROW TECH **+100**, CLASH **+100** each, a cross-up relaunch **+250**, and **ABSOLUTE ZERO** (win a round without taking a point of damage) **+1000**.

The repeat rule: the same trick pays less each time you repeat it in a round — the amounts above are what the first one pays. Big moments like Fast Work and Absolute Zero always pay in full. Training never pays QUANTA. Your career total banks after every match: ROOKIE > CONTENDER (5,000) > HEADLINER (15,000) > MAIN EVENT (40,000) > CHAMP (100,000) > LEGEND (250,000). Play on **Game Jolt** in your browser while logged in and your trophies and CAREER QUANTA score go to your Game Jolt account.

STAGE BREAKS

Knock somebody down **into the edge of the stage** with a knockdown or super hit and the wall loses: **STAGE BREAK!** — they get punched clean into a different stage and the fight follows them. Once per round, so make it count. Special editions:

- **Bruh-Man's From the Fifth Flo'** landing on his own Fifth Flo' stage: **THROUGH THE FLOOR!** — the belly flop drops you one apartment down... into Martin's place. He does live upstairs.
- **King Beef's movie set:** break the wall there and you're **KNOCKED OUT OF THE MOVIE** — out through the TV into the apartment, where Cole is watching: *"YO, THIS BOY'S GONNA GET AN OSCAR!"*
- **HITMAN's THROUGH THE WALL:** his second super IS a stage break. The punch goes through you — your ghost hangs in the air for a beat while your body flies — and the wall is left with a **hole shaped**

exactly like you. Then you land in the next stage like luggage.

- **TREY'S BAR:** get knocked out through its **right side** and you land in **THE ALLEY** out back — and Trey's BAR CHARGE takes you there from anywhere.
- The **Charity Bout ring** and the **bank** never break — some venues have insurance.

LIVING STAGES

- **Sheneneh's Salon:** Myra's getting her feet done the whole fight. If Sheneneh's fighting, Myra hollers "SHENENEH!" every round and gets hollered back at. Stick around and you'll meet **the sand blaster**. Myra loves it.
- **The Bank:** round 1, **Ms. Jerry** is at the ATM — the fight politely waits while she finishes ("See you later, big papa."). Round 2, if neither of them is in the match, **Dragonfly and Kenji** replay the whole $80 confrontation in the background, dive-into-the-bushes included.
- **King Beef's movie set:** home of the TV break, and where King Beef always hosts his Arcade fight.
- **Trey's Bar:** Trey's home stage. Watch the bartender when things get rough. **The Alley** is out back, past the busted door.

BONUS STAGE: THE ATM

ATM bonus stage: every hit pays (+$45 popup, cash on the ground, ATM health bar).

Pick **Bonus Stage** from the menu and bust open the Bank of Detroit ATM like it's a classic car stage — except the score is **money**:

- **50 cents per point of damage** (a jab is ~$20, a heavy ~$40)
- **Combos pay +8% per hit**, up to 2.5x — treat the ATM like a training dummy made of cash
- **Super hits pay 1.5x**
- Deal 6,000 damage and it **BUSTS WIDE OPEN: $500 jackpot + $20 for every second left**
- Martin milestones at $1,000 / $2,500 / $4,000 — "WHOO-WHOA-WHOA!"

Make **$2,500+** and guess who walks out for your money. **Dragonfly.** Beat him to take it back, plus up to **$500** for the health you kept (and another **$500** on a perfect). Make **$4,000+** and **Otis** — bank security — runs out to help YOU, because he's convinced Dragonfly robbed it. Beat Dragonfly and **Kenji appears for the $80 Dragonfly owes him** — it comes out of your pile, he bows, see you in class tomorrow. Play the whole thing

AS Dragonfly and it flips: Otis comes for you, the CPU is sharper, and Kenji wants his money from *you*. (Don't try to pick Otis for this mode: "Otis guards the bank. He's not robbing it!")

CHARITY BOUT

CHARITY BOUT menu: pick who steps in the ring vs THE HITMAN (one round, no sidekicks).

Win it and the results screen says it: YOU BEAT THE HITMAN!

Its own menu entry: **one round, in the ring, against THE HITMAN** — the full champion, MAD mode and all. You pick who steps in — no sidekick, no bench, nobody coming to save you. Pick Martin and he walks out in his boxing gear automatically, with the Sugar line ready. Break whatever you want; the fight stays in the ring.

ARCADE & THE SECRET BOSS

Arcade runs you through **every other fighter once**, random sidekicks, with **your true rival waiting at the end** (FINAL RIVAL). King Beef always hosts you on his movie set; HITMAN meets you in the ring. You're graded S through D on damage, combos, supers, counters and breaks.

And the tease you came for: **clear Arcade as Martin...** and before the credits, there's a knock. *SOMEBODY'S AT THE DOOR*. Answer it in your boxing gear.

OUTFITS

Same super facing left, so the DETROIT 11 jersey lettering is shown from the other side.

On character select, the **attack buttons pick your look**: LP = look 1, HP = look 2, LK = look 3 (HK = look 4 where it exists):

- **Martin:** Pistons #11 (default) • Original • **Boxing** (ring gear)
- **Cole:** Floral Shirt (default) • Original
- **Gina:** Green Blouse • Original
- **Pam:** Engagement Party dress • Original
- **Sheneneh:** Control • Original

ONLINE VERSUS

The v18.7 title screen with the II TURBO logo.

Pick **Online Versus** → **Host** opens a room and gets a **4-letter code**; your friend picks **Join** and types it in. Host is Player 1, host's speed setting applies, and **both of you need the same game version** (the game checks and tells you) — so when a new build drops, both of you download it. Young O.T. is open to both players online. There's even a same-PC test mode for trying it in two windows. Under the hood both machines run the exact same fight and only button presses travel — so play wired if you can and blame the other guy's wifi if you lose.

---

10 "DID YOU KNOW" SECRETS

1. **The fight waits for Ms. Jerry.** Round 1 at the bank, the intro literally holds until she finishes at the ATM, looks around, and delivers "See you later, big papa."

2. **Win beat-up, meet the champ.** Take Martin to swollen-face mode, win the match anyway, and THE HITMAN himself walks on to tell him: "Yeah, you got a lot of heart, man." Martin's reply is canon.

3. **Bruh-Man's taunt is a sandwich.** Once per round it heals him about 70 health. He is the only fighter in the game who can eat his way back into a match.

4. **Gina only screams one name.** Her shout attack pops up "MARTIN!!" exclusively against Martin. Everyone else gets a "HEY!!" like a stranger.

5. **90's FINE plays favorites.** The men freeze and gawk with hearts in their eyes during Pam's photo-shoot super; Pam, Gina and Sheneneh victims roll their eyes. And Cole takes 25% extra. Read into that what you will.

6. **The coat heist is real.** Lose round 1 as King Beef and his own entourage repossesses his coat mid-set. Survive to the final round and they bring it back with a full "GO KING BEEF!" chant.

7. **Otis has a story.** Beat The Hitman with Otis to unlock his younger self, and before the reveal you get an animated short about his 1956 Army boxing days — with its own original score, "Still Standing". The Story of Otis can also be watched in the Reveal Theater.

8. **Spam goes stale.** Throw the same move over and over and it loses up to 60% of its damage — the word STALE floats up to shame you personally.

9. **Kenji keeps it professional.** His taunts and money lines only come out against Dragonfly — the man who owes him $80. Against anyone else he just says: "See you in class tomorrow!"

10. **The door knock is scripted to the shakes.** Clear Arcade as Martin and count the three knocks before the portrait fades in. SECRET BOSS: HITMAN — and yes, the fight is in the ring, and yes, Martin answers the door already wearing his gloves.

See you at Nipsey's. First round's on Tommy — he just got a job.

More than perfect — Perfect Squared.
